Your Courage.
Our Care.

***Combining your strengths with
ours to create new value***

100 years of Terumo.

Every step along our journey so far has been driven by the desire to help relieve patients' pain, even if for only a moment, while reducing the workload of doctors and medical staff as much as possible.

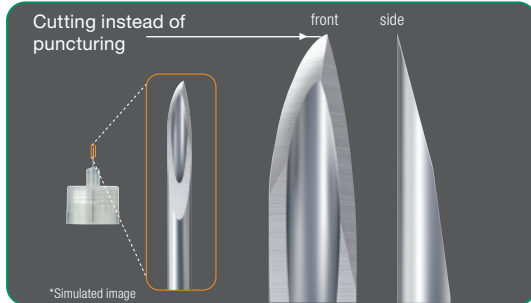

Understanding diabetes, Terumo has been developing and providing devices that effectively support diabetic patients and medical specialists.

In this milestone year that marks the 100th anniversary of both the discovery of insulin and Terumo's foundation, we make the commitment to always stand beside diabetic patients, providing the services to support a happier life.

With its advanced technology, a wide range of solutions and high-quality manufacturing, Terumo is driving diabetes-related business forward.

• Technology

Terumo provides comprehensive support for diabetic patients' everyday lives via its technology.

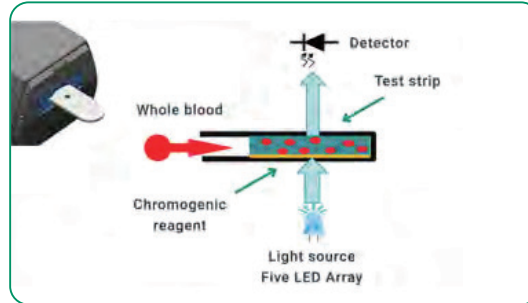

Easy subcutaneous injection for everyone

- The world's thinnest 34G double tapered pen needle^{*2}
- Asymmetric bevel^{*2}
- Slim, double tapered shape^{*2}

^{*1} Based on research by Terumo Corporation as of November 2020.

^{*2} Patented technology.

High-accuracy blood glucose measurement technologies

- Measurement accuracy of $\pm 8\%$ ^{*3} for appropriate insulin administration
- A thermostable reagent that does not deteriorate even at 50°C

^{*3} Innovative optical transmission absorbance system to realise $\pm 5\%$ high accurate BGMS. T. Moriuchi, et al., EASD 2019, ePoster#886.

• The wide range of Terumo's diabetes business in Japan

Terumo has a wide range of experience and successful achievements in the diabetes-related market in Japan, providing various products, from pen needles to devices for self-monitoring of blood glucose (SMBG) and a patch pump.

^{*}Terumo exclusively sells the Dexcom CGM in Japan through a partnership contract.

• Stable product quality and supply

Whether a large volume, speed or delicate handling is required, Terumo's advanced manufacturing processes ensure a stable supply of the high-quality products.

Combining your strengths with ours to create new value
